EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph A. Rhoa on December 15, 2005.

The application has been amended as follows:

In claim 1 at the end after laser insert -- ; and wherein each of the first and second sectional sidewalls comprise adjacent sections that are spaced apart from one another. --,

Cancel claims 48 and 50.

In claim 64 at the end after cavity insert -- ; and wherein each of the first and second sectional sidewalls comprise respective adjacent sections of sidewall that have respective gaps therebetween. --,

Allowable Subject Matter

Claims 46, 47, 51-69 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 46, 47, 51-63

After reviewing applicant's amendment, arguments and conducting an updated search none of the cited prior arts alone or in combination disclose the claimed laser

Art Unit: 2828

with the structural combination of independent claim 46, having the recited cavity with the protrusion extending into the cavity and in particular having the first and second sectional with adjacent sections of the sidewall that are spaced apart from one another.

Regarding claims 64-69,

After reviewing applicant's amendment, arguments and conducting an updated search none of the cited prior arts alone or in combination disclose the claimed laser with the structural combination of independent claim 64, having the recited cavity with the protrusion extending into the cavity and in particular having the first and second sectional with adjacent sections of the sidewall that have gaps therebetween.

The closest references to Basting et al (US 3,757,246) and Allcock (US 4,817,108) disclose gas lasers with elongated cavities, where the Basting et al reference also discloses the use of rails within the cavity, which extend into the cavity; however, the Basting et al reference and the Allcock reference fail to disclose, suggest or imply the sidewalls as having sections which are spaced apart or having gaps between the sections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
